

Joan Bono Frígols

Android & Kotlin Multiplatform Developer | AI Integration

Sellent, Valencia • +34 630 41 46 12 • joanbonoprog@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL PROFILE

Software developer specialized in Kotlin and multiplatform development, with hands-on experience in Android applications and generative AI integration. Developed multiplatform applications leveraging Clean Architecture, LLM integration (GPT-4, Claude, Gemini), and automated workflow management. Focused on continuous improvement and building efficient, maintainable software.

EDUCATION

Master's Degree in Generative Artificial Intelligence | EVOLVE — Remote | 2025 | 480h + Master's Thesis

- Engineering of autonomous AI agents and multi-agent workflows
- Integration of generative AI into applications and process automation
- Design and implementation of chatbots powered by LLMs
- Low-code and no-code AI tools: n8n, Make

Higher Degree in Multiplatform Application Development (DAM) | IFP Formación — Remote | 2021 – 2025

- Android and desktop application development using Java and Kotlin
- Object-oriented programming: Java, C#
- Relational database design and management with MySQL and SQLite
- Creation and consumption of REST APIs
- Web development with PHP and JavaScript

FEATURED PROJECTS

App Prototype Creator | Master's Thesis — Kotlin Multiplatform — 2024 – 2025

- Multiplatform tool (Android + Desktop) that generates functional application prototypes through conversational AI chat
- Stack: Kotlin Multiplatform, Compose Multiplatform, Ktor, Koin, SQLDelight, Clean Architecture
- Multi-provider LLM integration: OpenAI GPT-4.1, Anthropic Claude 3.5, Google Gemini Flash
- HTML/CSS/JS prototype rendering on desktop: integrated JavaFX WebView and CEF (main technical challenge)
- Secure API key storage: EncryptedSharedPreferences (Android) and Java Preferences API (Desktop)
- [GitHub Repository](#)

Live Football App | Final Degree Project — Android / Java — 2024

- Native Android app for managing a football club/team, with a manual live match-tracking screen (score, timer, cards) updated in real time by an on-site assistant during the match
- Stack: Java, Android, SQLite, Firebase (Analytics, Crashlytics)
- Responsible for backend development, database design, and CRUD implementation
- [GitHub Repository](#)

EXPERIENCE

Web Developer (WordPress) | Artimark — Llanera de Ranes, Valencia | Jun 2024 – Jan 2025

- Developed and implemented the corporate website architecture using WordPress, PHP, and MySQL
- Developed and tested a custom product management system with business logic in PHP
- Integrated, configured, and maintained secure payment gateways with built-in security validations
- Built responsive interface components using HTML and CSS according to functional specifications
- Executed technical SEO optimization (URL structure, metadata, performance) and web metrics analysis

Digital Content Creator | Sellent Festive Culture Association — Sellent, Valencia | 2016 – 2018

- Designed and executed digital campaigns: +60% visibility growth for featured events
- Coordinated cultural events: +40% increase in attendance

TECHNICAL SKILLS

Languages: Java, Kotlin, PHP, JavaScript, C#

Mobile & Multiplatform: Android, Kotlin Multiplatform (KMP), Compose Multiplatform

Architecture: Clean Architecture, MVVM, Dependency Injection (Koin)

Networking & APIs: Ktor, REST APIs.

Databases: SQLite, SQLDelight, MySQL

Tools: Git, GitHub, Docker, IntelliJ IDEA, Android Studio, VS Code, Windsurf

AI & LLMs: OpenAI GPT-4, Anthropic Claude, Google Gemini, n8n, Make

Currently Learning: Spring Boot, Spring AI

LANGUAGES

Spanish: Native speaker

Valencian / Catalan: Native speaker

English: Technical professional proficiency (actively improving)

ADDITIONAL INFORMATION

Driving license (Type B) and own vehicle available • Full availability for on-site, hybrid, or remote job opportunities
