

Joan Bono Frigols

Software Developer & AI Integration Specialist

Software developer specialising in Java and cross-platform development, with knowledge in designing and deploying scalable applications. I complement my technical profile with training in generative AI and process automation, applying these technologies to optimise productivity and improve user experience. Passionate about technological innovation, code efficiency and continuous improvement.

EXPERIENCE

Artimark, Llanera de Ranes, Valencia: **Wordpress Web Developer** [\(Página Web\)](#)

SKILLS

Development

- Knowledge of Java Environment.
- Basic knowledge of C#.
- Database Development in MySQL.
- Basic knowledge of JavaScript and PHP.
- Knowledge of Android development.
- Basic knowledge in the use of graphics engines such as Unity.
- Basic knowledge of Docker.

Automation

- Knowledge of automation tools such as n8n or Make.
- Knowledge of Generative AIs and their implementation in Applications.

Content Creation

- Veo 3.
- Mid Journey.
- ElevenLabs.

IFP FORMACIÓN, Remote: *Higher Degree in Multi-platform Application Development*

2021- 2025

- Development of applications for Android mobile devices and desktops.
- Object-oriented programming with Java and C#.
- Web Development with PHP and JavaScript.
- Design and management of relational databases with MySQL.
- Basic Videogame development with Unity.
- Creation and consumption of web services (REST APIs).
- Management of software development projects.

IDIOMS

- Spanish: Native.

- Valencian/Catalan: Native.

- English : Basic Professional.

PROJECTS

Live Football App: *Final Year Grade's Proyect*

Android application developed in Java for comprehensive football match managment. Responsible for the backend and database design in SQL Lite.

Implementation of interface with real-time updates

- [Github Repository.](#)

App Prototype Creator: *TFM*

Generative AI-based tool that converts conceptual ideas into functional prototypes. Built with Kotlin Multiplatform and Compose Multiplatform. Integration of AI models to generate dynamic interfaces.

- [Github Repository.](#)
