Interest in Android development,
Backend, AI and Automation

Professional Profile

Software developer specialized in Java and multiplatform development, with knowledge in design and deployment of scalable applications.

I complement my technical profile with training in generative AI and process automation, applying these technologies to optimize productivity and improve user experience.

Passionate about technological innovation, code efficiency and continuous improvement.

Academic Background

Master's Degree in Generative Artificial Intelligence

2025 (480h + Master's Thesis)

EVOLVE

- Development of autonomous agents with AI
- Integration of generative AI in automated workflows
- Design, implementation and optimization of chatbots powered by generative AI
- Creation of no-code (and low-code) applications using platforms with generative AI
- Multimedia content generation (image, video, audio) with AI tools

Higher Degree in Multiplatform Application Development

2021 – 2025

IFP Training

Llanera de Ranes, Valencia

- Development of applications for Android mobile devices and desktop
- Object-oriented programming with Java and C#
- Web development with PHP and JavaScript
- Design and management of relational databases with MySQL
- Basic video game development with Unity
- Creation and consumption of web services (REST APIs)
- Software development project management

Featured Projects

App Prototype Creator (Master's Thesis)

- Tool based on generative AI that converts conceptual ideas into functional prototypes
- Built with Kotlin Multiplatform and Compose Multiplatform
- Integration of AI models to generate dynamic interfaces

View Repository

Live Football App (Final Degree Project)

- Android application developed in Java for complete football match management
- Responsible for backend and database design in SQLite
- Implementation of interface with real-time updates

View Repository

 Professional Experience

Web Developer (WordPress)

June 2024 – January 2025

Artimark

 Llanera de Ranes, Valencia

- Development of corporate website from scratch applying good practices of web architecture and performance
- Implementation of a product management system, improving the client's internal efficiency
- Integration and maintenance of online payment gateway with enhanced security
- Design of modern, intuitive and responsive interface in collaboration with the design team
- SEO optimization and metrics analysis to increase site visibility

 View Website

Content Creator

2016 – 2018

Sellent Festive Culture Association

 Sellent, Valencia

- Designed and executed digital campaigns that increased event visibility by +60%
- Coordinated events that increased attendee numbers by 40%
